

STEP ONE: Mobility Score and Record Review

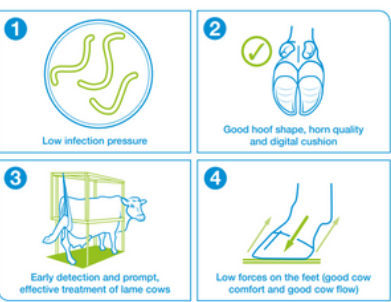

- Independent mobility score (RoMS)
- Review of trimming and treatment records to help determine the most common lesions and complete the Lameness Map

STEP TWO: Skills Review

- Farm visit to assess trimming and treatment skills on the farm
- Opportunity to assess horn quality, lesion type and provide some skills training

STEP THREE: Risk Assessment

- Thorough farm walk assessing and discussing main risk factors for lameness
- The Lameness Map is used to help identify the main Success Factors to focus on

STEP FOUR: Action Plan

Action	Due Date	Responsible	Progress
Improve lameness recording. Use existing lameness and treatment records to identify common lesions and digital cushion issues.	Immediate	AGAP	
Improve hoof hygiene. Review the effectiveness of current hoof hygiene practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	
Improve hoof trimming. Review the effectiveness of current hoof trimming practices and ensure they are being followed correctly.	AGAP	AGAP	

- Team meeting to discuss the findings from the previous visits and highlight areas for improvement
- Solutions for improved lameness management are discussed and action points agreed

STEP FIVE: Recording, Monitoring and Reviewing

- Independent mobility scores every 3 months
- On-farm review every six months to review and update action plan
